- Driven by creativity and a 'research through design' approach
- Always a neighbour to all

EDUCATION

UNIVERSITY OF THE WEST OF ENGLAND

- **MASTER OF SCIENCE IN CREATIVE TECHNOLOGY**
First Class Honours

Exploring the creative application of technology mediums in practice and developing research through design

Student Representative

- **BACHELOR OF SCIENCE IN CREATIVE MUSIC TECHNOLOGY**
Upper Second Class Honours

Exploring the creative application of technology mediums in practice and developing research through design

ADDITIONAL QUALIFICATIONS

- LCM Popular Vocals Grade 4 - Distinction
- LCM Popular Vocals Grade 1 - Distinction
- Intermediate Proficiency Guitar, Drums and Vocal Performance
- Composition and Theory in Classical and Jazz

WHO AM I?

Hey, I'm Luke! I am a Creative Technologist and Audio Designer from Bristol, UK. I started out as a performing musician through high school and college, singing and shredding in some questionable bands, until specialising in creative technologies through university. I love the weird and wonderful, and you can often find me experimenting with complex and irrational time signatures or recording things to manipulate for a sound effect later. Away from work, I enjoy listening to Biffy Clyro, drinking whiskey and playing one too many games with my hometown buddies.
